# We don't just fill orders.

There are a lot of things we don't do that separate us from other biochemical companies. Filling an order without offering assistance is just one of the things we don't.

For example: When you call U.S.B. collect, with an order or a problem you'll get someone knowledgeable on the line. Knowledgeable enough to work with you in developing information and locating the materials you need. Up to date enough to feed back the kind of information that helps you solve problems.

That's a policy we maintain on all products we provide. On any of our several thousand high purity biochemicals, biological diets, and the custom work we do. Of course, your custom procedures and

formulations are held in strict confidence. And almost all our orders are shipped the day they're received. Unless you call with an emergency order; then we'll ship it within one hour.

And we guarantee the quality of our product as represented to you, or we'll replace it at no cost.

We don't expect you to be completely convinced. So clip this coupon to send for our Biochemicals Catalogue and Biological Diets Brochure. Then phone us, at 216-663-0330 to place an order or just to ask a few pertinent questions.

You'll be convinced it's what we don't do that separates us from what other biochemical companies do.
